## **DETAILED ACTION**

The Declaration under 37 CFR 1.132 filed 1/31/05 is sufficient to overcome the rejection of claims 1-16 based upon Wrublewski et al. (US 6174309).

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 4 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not adequately disclose a body being pivotally joined to the handle as recited in the claim.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/657,378

Art Unit: 3739

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamauchi et al. (US 6736813). Yamauchi et al. disclose a bipolar electrosurgical instrument comprising a handle (Figure 16a), a body (507) joined to the handle, a jaw assembly joined to the body and arranged such that manipulation of the handle allows tissue at a surgical site to be clamped between opposed jaws of the jaw assembly, the jaw assembly having length, height and width axes, a first pair of the opposed jaws (451b; figure 13) having at least a first sealing electrode (453b), the jaw being formed with a recess formed longitudinally along the length axis, the recess having first and second sidewalls, each sidewall having at least a portion extending at an oblique angle to the width axis of the jaw assembly; the other of the opposed jaws (451a) having at least a second sealing electrode, the jaw having a cross-section exhibiting a raised central zone adapted to conform to the recess of the first jaw for pinching and tensioning the tissue when at least one of the jaws is made to close relative to the other jaw; and a cutting electrode (455).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rosiland S Rollins whose telephone number is (571) 272-4772. The examiner can normally be reached on Mon.-Fri. 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
